Getting the best results from the Enlist™ weed control system starts with knowing how to use it the right way.

This guide walks through the steps for cleaning out your sprayer and all spray equipment after applying Enlist Duo® or Enlist One® herbicide – before making your next application to any other crop. Thorough cleanout of the entire sprayer – including spray tank, boom, screens, filters, hoses and nozzles – is the first step to minimize the potential for sprayer contamination and damage to susceptible crops. Also, remember to clean equipment, such as pumps, before switching to the next product.

THE NEXT CROP YOU'RE SPRAYING	
GLYPHOSATE-TOLERANT CORN	**ALL OTHER CROPS**
Single-rinse sprayer with at least 10% of sprayer volume	Triple-rinse sprayer

Guide to sprayer cleanout

Enlist™ Ahead

How to triple-rinse the sprayer

RINSE 1

1. Completely drain system (including pump, lines and boom) for at least five minutes.
2. Fill tank with clean water to at least 10% of total tank volume.
3. Circulate through entire system at least 15 minutes.
4. Spray out solution through boom/nozzles.

RINSE 2

1. Completely drain system (including lines and spray boom) for at least five minutes.
2. Remove and clean filters and strainers.
3. Fill tank with clean water to at least 10% of total tank volume (including cleaning agents at recommended rates if desired).
4. Circulate through system at least 15 minutes.
5. Let solution stand for several hours, preferably overnight if time allows.
6. Spray out solution through boom/nozzles.

RINSE 3

1. Completely drain system (including lines and boom) for at least five minutes.
2. Fill tank with clean water to at least 10% total tank volume.
3. Circulate through entire system at least 15 minutes.
4. Spray out solution through boom/nozzles.
5. Completely drain spray system, remove and clean nozzle tips and strainers separately.

!

ALL RINSE WATER MUST BE DISPOSED OF IN COMPLIANCE WITH LOCAL, STATE AND FEDERAL GUIDELINES.
