**Dow AgroSciences Names Enlist™ Field Specialist for Midsouth**

*Wright will support growers, retailers and applicators adopting Enlist technology*

**INDIANAPOLIS — April 7, 2016 —** Continuing its support for growers, retailers and applicators, Dow AgroSciences has named Scott Wright as an Enlist™ field specialist. Wright will serve the Midsouth as a member of a team of regional experts supporting the Enlist weed control system, an advanced herbicide and trait system that delivers exceptional weed control.

“The addition of Wright means we continue to put our customers first by providing technical support for the Enlist system,” says Jonathan Siebert, Ph.D., Enlist field sales leader. “Our field specialists are truly a valuable resource and differentiator in the marketplace. Like other Enlist field specialists throughout the Midwest and South, Wright will work closely with crop protection personnel, seed sales staff, distributors, retailers, consultants, and, of course, growers.”

Based in the Memphis area, Wright will provide information, education and sales support for the entire Enlist™ weed control system. He'll also help implement Enlist Ahead, a management resource for the Enlist system.

Wright joined Dow AgroSciences in 2011 as an industrial vegetation management (IVM) sales representative in the Midsouth after working 10 years as a research associate for Mississippi State University (MSU). In 2014, he moved to Indianapolis as the IVM product manager. He earned his bachelor's degree in turfgrass management and his master's degree in weed science from MSU.

The team of Enlist field specialists are experts in weed management, application technology and crop research. They provide field training to help others understand the technology and make the best weed control decisions for their own operations or the operations they serve.

Visit [Enlist.com](http://Enlist.com) and follow us on Twitter at [@EnlistOnline](https://twitter.com/EnlistOnline) to learn more about the Enlist™ system.
