**Haley Nabors named Enlist™ field specialist**

Additional technical support provided in Texas, Oklahoma, southwestern Kansas

**INDIANAPOLIS — May 28, 2015 —** In a continued effort to support growers, Dow AgroSciences has named Haley (Baumgardner) Nabors as the new Enlist™ field specialist supporting Texas, Oklahoma and southwestern Kansas. Nabors joins the team of regional experts supporting the Enlist Weed Control System, an advanced herbicide and trait system that delivers exceptional weed control in cotton, corn and soybeans. Regulatory approvals are pending for Enlist cotton.

“With the addition of Haley to the team, we are able to offer customers in key geographies the technical support they need to adopt the Enlist system,” says John Kalthoff, cross-platform portfolio marketing leader, Dow AgroSciences. “Our field specialists are truly a valuable resource and differentiator in the marketplace.”

Key aspects of Nabors’ new role include sensitive crop and stakeholder outreach, training, assisting with service inquiries and helping to implement Enlist Ahead, a management resource for the Enlist™ system.

A graduate of Oklahoma State University with a bachelor’s degree in agricultural economics, Nabors now transitions from her role as a crop protection sales representative with Dow AgroSciences in Texas.

In her new role, Nabors will report to Jonathan Siebert, Enlist field specialist leader. She has relocated to Enid, Oklahoma.

The team of Enlist field specialists are experts in weed management, application technology and crop research. They also are integral to Enlist Ahead, which is designed to help growers, applicators and retailers get the best results from the Enlist™ system — today and in the future. In addition, they provide field training to help others understand the technology and make the best decisions for their customers' farm or their own operations.
