

# HIGH YIELDS AND CLEAN FIELDS

## MAXIMIZE SOYBEAN YIELD POTENTIAL WITH THE ENLIST™ WEED CONTROL SYSTEM

When you grow **Enlist E3™ soybeans**, you get:

- Advanced soybean genetics with high yield potential

- Tolerance to 3 different herbicide modes of action

- Reliable, effective control of the toughest weeds in your field

- High return on investment

**As a reminder**, Enlist E3 soybean growers must have a valid Technology Use Agreement and follow the label recommendations for proper use of Enlist™ herbicides on their crop.

## The Enlist™ weed control system gives you the choice of Enlist herbicides

OR

(Group 4 and 9)  
For the **convenience** of both 2,4-D choline and glyphosate in one formulation

(Group 4)  
For the **flexibility** to tank-mix and adjust the rates of glyphosate and glufosinate

**90+ WEEDS CONTROLLED**

including grasses and many hard-to-control and resistant weeds

**40+ BROADLEAF WEEDS CONTROLLED**

including a wide range of hard-to-control and resistant weeds

Both Enlist herbicides include Colex-D™ technology and offer:

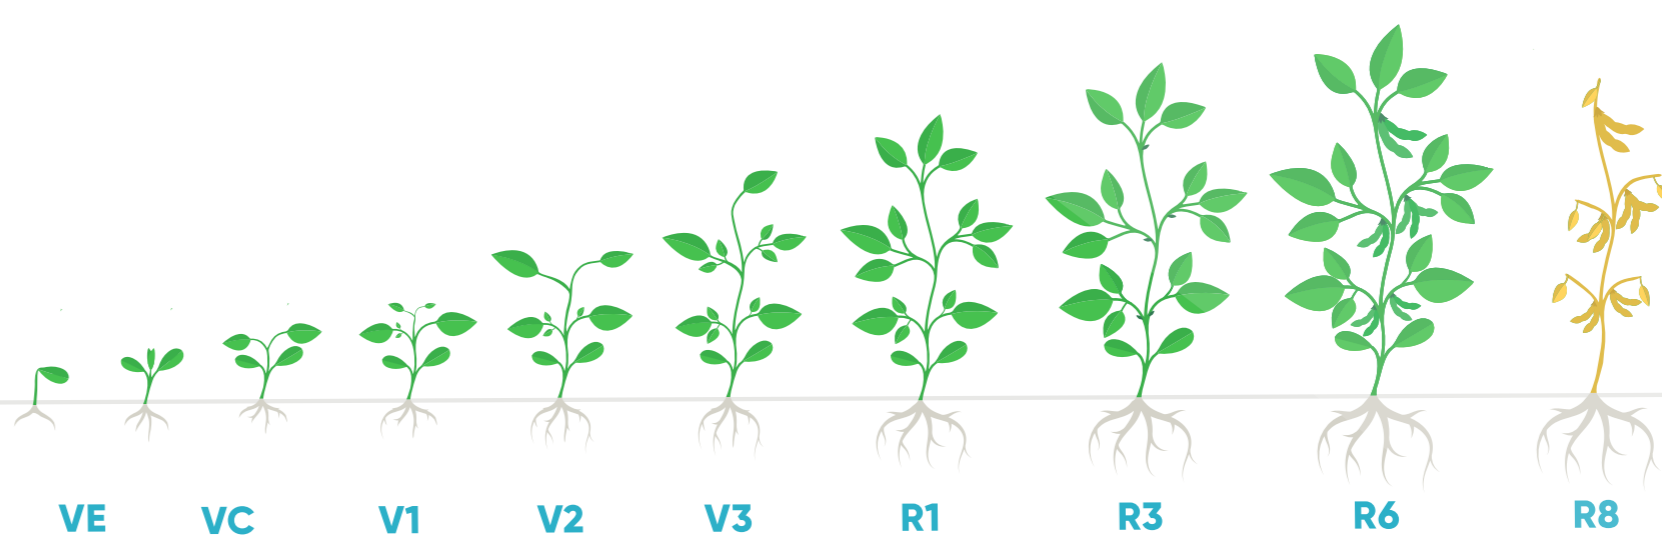

**Near-zero volatility**  
96% less volatile than 2,4-D ester

**Reduced drift**  
90% less drift than traditional 2,4-D

**Low odour and improved handling characteristics**

And offer a wide window of application

From pre-plant burndowns up to the R2 stage

Enlist herbicides are critical tools enabling post-emergence control, without fear of off-target movement.

Use Enlist herbicides as part of a **Program Approach** for better weed control and resistance management.

This **two-pass system** allows growers to use **multiple modes of actions** to effectively manage hard-to-control and resistant weeds.

### BENEFITS INCLUDE:

- ✓ **Reduced early season competition** from annual grass and broadleaf weeds
- ✓ **Multi-modes of action for resistance management**
- ✓ **Timely post-emergent applications for optimum weed control and reduced weed competition**

### Applying Enlist herbicides:

- Boom height at 60cm or less

- Optimum spray volume at 10-15 GPA

- Use nozzles that deliver coarse to extremely coarse spray droplets

- Spray when winds are between 3-16 km/h
- Do not spray in winds that exceed 25 km/h
- Do not spray during a temperature inversion

Enlist herbicides are easy to apply and user friendly

**No temperature restrictions** – spray when conditions are ideal for weed control

**Near-zero volatility** ensures that applications stay on target

**Simple tank cleanout procedures** are easy to follow
