

**The Enlist™ weed control system will change how you think about weed management in soybeans.**

Enlist E3™ soybean varieties are now available. Using the Enlist weed control system, farmers can take control of resistant and hard-to-control weeds.

**WHY USE THE ENLIST WEED CONTROL SYSTEM?**

- › A system with new traits providing herbicide tolerance in soybeans and corn
- › Herbicide solutions built on an improved form of 2,4-D that lands and stays on target, enables management of hard-to-control and resistant weeds with Group 4 herbicides
- › Enlist Stewardship resources that support the use of multiple modes of action to manage resistant weeds, provide training, and promote responsible and sustainable use

**Enlist E3™ Soybeans**

Enlist E3 soybeans provide high-yielding soybean genetics and industry leading triple-mode of action herbicide tolerance.

**WHY USE ENLIST E3 SOYBEANS?**

- › Enlist E3 soybeans are tolerant to 2,4-D, glyphosate and glufosinate herbicides, which are part of a strong resistance management strategy
- › Excellent crop tolerance enabling applications up to the R2 growth stage

**Enlist™ herbicides that land and stay on target**

**COMPLETE CONVENIENCE.**

Enlist Duo provides the convenience of both 2,4-D choline and glyphosate in one formulation for control of grasses and broadleaf weeds including hard-to-control and resistant weeds.

**FLEXIBILITY AND CHOICE.**

Enlist 1, a stand-alone 2,4-D choline formulation, provides the flexibility to tank-mix and adjust the rates of glyphosate or Liberty® 200 SN (glufosinate) for hard-to-control and resistant weeds.

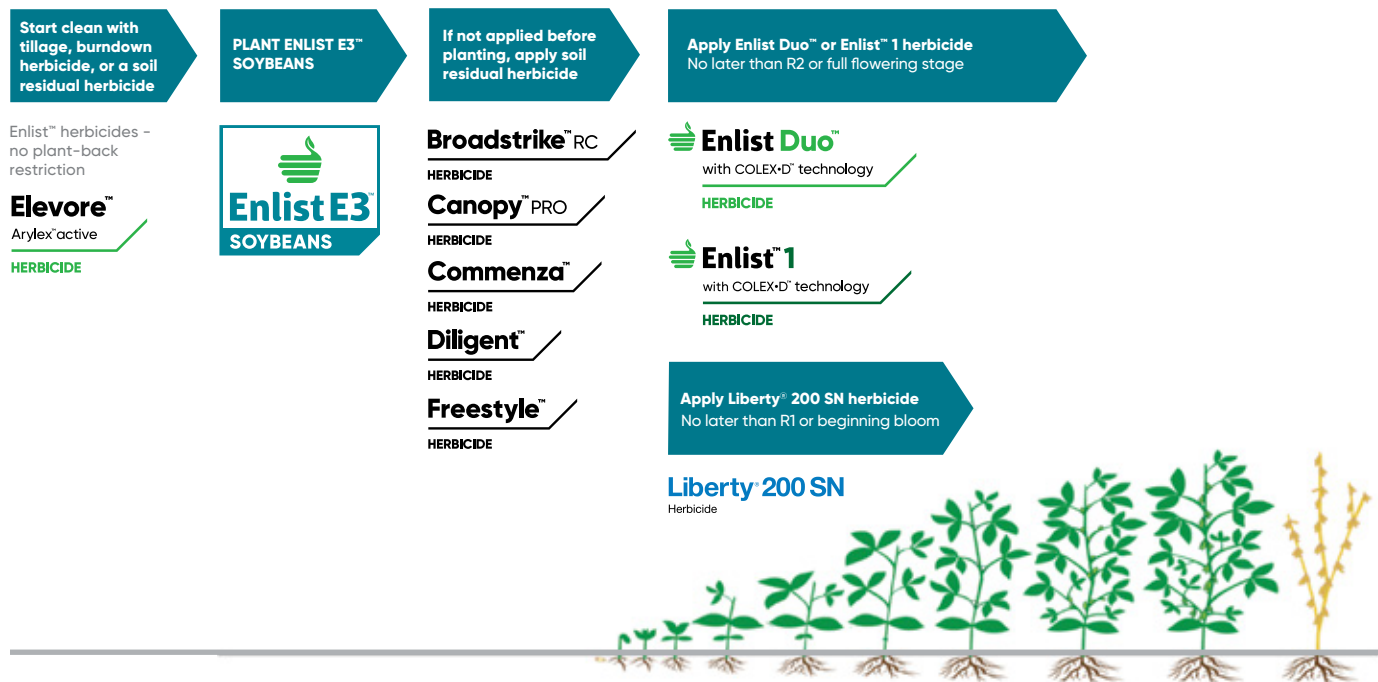

| COLEX·D™ technology                   |  |                                   |                                   |
|---------------------------------------|--|-----------------------------------|-----------------------------------|
| WHAT GOES INTO IT                     |  |                                   |                                   |
| 2,4-D choline with Colex-D Technology | Latest formulation science             | Proprietary manufacturing process |                                   |
| WHAT IT DELIVERS                      |  |                                   |                                   |
| Near zero volatility                  | Minimized potential for physical drift | Low odour                         | Improved handling characteristics |

## Enlist Duo™ and Enlist™ 1 are powerful tools as part of the Enlist™ Weed Control System

- › Colex-D technology helps ensure that Enlist herbicides land and stay on target
- › Wide window of application from pre-plant burndowns up to the R2 stage (full flower).
- › Designed to be used with complimentary herbicides as part of a Program Approach to manage a wide range of hard-to-control and resistant weeds like:
  - › Canada fleabane
  - › Common Lamb's-quarters
  - › Common ragweed
  - › Eastern Black Nightshade
  - › Giant ragweed
  - › Pigweed species
  - › Velvetleaf
  - › Waterhemp
