### How It Works

**Example calculation A:**
Grower purchased 500 acres of Enlist Duo and 700 acres of Sonic.
Grower earns $0.50/acre an each Enlist herbicide acre. He earns an additional $1 per acre for each acre of Sonic that is matched with an acre of an Enlist brand:

- 500 Enlist Duo acres \( \times \) $0.50 per acre = $250
- 500 Sonic acres matched with Enlist \( \times \) $1.00 per acre = $500
- **Total earnings** = **$750**

**Example calculation B:**
Grower has 500 acres of E3 soybeans. He burns down with Enlist Duo herbicide; applies Trivence preemergence; then sprays Enlist One + Durango DMA + EverpreX post.

**Earnings are:**

- 500 Enlist Duo acres \( \times \) $0.50 per acre = $250
- 500 Trivence acres \( \times \) $1.00 per acre = $500
- 500 Enlist One acres \( \times \) $0.50 per acre = $250
- 500 EverpreX acres \( \times \) $1.00 per acre = $500
- **Total earnings** = **$1500**
