

# Enlist One<sup>®</sup> + Liberty<sup>®</sup> Herbicides

## More flexibility. More certainty. United. Weeds fall.

Put Enlist One<sup>®</sup> herbicide + Liberty<sup>®</sup> herbicide to work for you on Enlist E3<sup>®</sup> soybean and Enlist<sup>®</sup> cotton acres. With multiple sites of action working together to control glyphosate-resistant weeds, you can maximize the value of the tolerances in the Enlist trait.

## Take a zero-tolerance approach to resistant weeds.

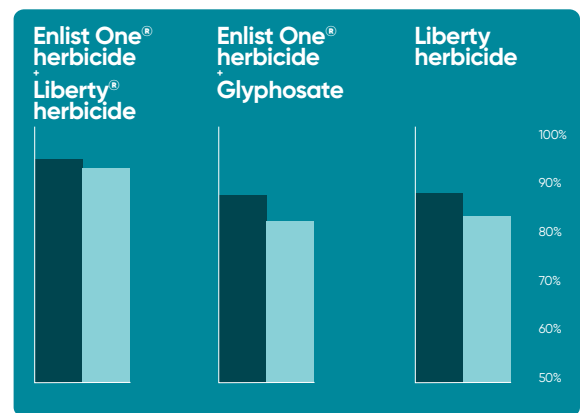

When you mix Enlist One and Liberty herbicides, you'll get one of the toughest and most effective postemergence control pairings against waterhemp, Palmer amaranth and other broadleaf weeds.

## Good news for yields, bad news for tough weeds.

See how Enlist One<sup>®</sup> and Liberty<sup>®</sup> herbicides work in combination to control troublesome broadleaf weeds such as pigweed, kochia, and lambsquarters.

## Broadleaf control.<sup>1,2</sup>

Take advantage of multiple sites of action for effective weed control.

● Exceptional control    ● Moderate control    ● Not labeled for control

■ Broadleaf    ■ Pigweed

## Tank-mix optimization

**Rates**

**Enlist One® herbicide:** 2 pt./A

**Liberty® herbicide:** 2 pt./A

**Weed height** 3 inches tall or less

**Carrier volume**

**Recommended:** 20 GPA

**Min. requirement:** 15 GPA with tank mix of Enlist One® + Liberty herbicides

**Adjuvants**

**AMS:** 1.5 to 3 lb./A

May be any combination of qualified dry AMS, liquid AMS or AMS-containing products found on [EnlistTankMix.com](http://EnlistTankMix.com)

**Qualified nozzle selection**

Use nozzle and corresponding spray pressure from the qualified list for Enlist One herbicide

Optimize coverage with qualified nozzles by using a less coarse nozzle and higher operating pressure

**Weather**

**At spray:** Avoid low humidity and cloudy conditions

**Spraying time**

Between two hours after dawn and two hours before sunset

**Wind speed**

**Max:** 10 mph

Use a tank mix of Enlist One® + Liberty® herbicides as part of a complete program approach for season-long weed control.

- Start clean with a burndown or tillage.
- Use effective residual herbicides at preemergence and post timings.
- Spray postemergence when weeds are small – 3 inches tall or less.
- Use up to two postemergence applications each of Enlist One® herbicide and Liberty® herbicide.

United, Enlist One® and Liberty® herbicides are an effective tank mix against Palmer amaranth and other tough weeds.<sup>1,2</sup>

The tank mix of Enlist One® + Liberty® herbicides provides >90% control of pigweed and other troublesome broadleaf weeds in joint research.<sup>1,2</sup>

Similarly, the tank mix of Enlist One® + Liberty® herbicides provides 15% better control of waterhemp and Palmer amaranth compared to Enlist One + glyphosate.<sup>1,2</sup>

\*May require a broader management plan including timely application and use of a soil residual herbicide.
