Exceptional weed control to fit your needs.

Made for use with cotton, soybeans and corn with the Enlist™ trait, Enlist Duo® and Enlist One® herbicides each feature 2,4-D choline with Colex-D® technology.

The result: unrivaled weed control designed to land and stay on target.

Proprietary Colex-D technology enables on-target application, delivering unrivaled weed control to protect your crops – and your neighbor’s crops.
Complete convenience.

Only Enlist Duo® herbicide combines the proven performance of 2,4-D choline and glyphosate. The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance.

This easy-to-use proprietary blended herbicide allows:

1. Improved control from two modes of action
2. Multiple modes of action in a convenient blend
3. Improved tank stability for a blend that stays mixed
4. Practical tank cleanout procedure

APPLICATION RATE

| Glyphosate-resistant or hard-to-control weeds | 4.75 pt./A |

Enlist Duo

Additional tank-mix flexibility.

Enlist One® herbicide provides additional tank-mix flexibility with glufosinate and other qualified tank-mix products, allowing for a customized weed control program to fit each farm. Farmers gain superior control of resistant and hard-to-control broadleaf weeds.

With more tank-mix flexibility, Enlist One® herbicide delivers:

1. 2,4-D choline as the basis for exceptional control
2. Compatibility to tank-mix with qualified glufosinate, residual herbicides and insecticides
3. Customize the ratio of herbicides to match each farm's needs
4. Flexibility to choose different modes of action to manage resistance

APPLICATION RATE

| Glyphosate-resistant or hard-to-control weeds | 2 pt./A |

Enlist One

On-target application.

90% less drift than traditional 2,4-D

The drift reduction from Colex-D® technology combines with low-drift nozzles to cut drift by as much as 90% compared with traditional 2,4-D.

96% less volatile than 2,4-D ester

Near-zero volatility – up to 96% less than 2,4-D ester – helps keep Enlist herbicides in place and improve control.

WIDE APPLICATION WINDOW

- **Enlist™ cotton**
  - Up to midbloom

- **Enlist E3™ soybeans**
  - No later than R2 (full flower)

- **Enlist™ corn**
  - No larger than V8 or 30 inches

The same application window you're used to with glyphosate.

Visit Enlist.com to learn more about how the Enlist™ system can help you take control of weeds like never before. Find the most current list of allowable tank-mix products for Enlist Duo® and Enlist One® herbicides at EnlistTankmix.com.
