Dow AgroSciences names Enlist™ field specialists *Growers, applicators, retailers will benefit from technical support in Corn Belt and Upper Midwest*

INDIANAPOLIS — Feb. 16, 2015 — Dow AgroSciences continues to provide in-field technical resources with regional field specialists for the Enlist™ Weed Control System. **Andy Asbury** will support the central Corn Belt, **Ryan Keller** will support the Upper Midwest and **Van Malter** will support the western Corn Belt.

“We are pleased to bring our new field specialists on board as a valuable resource for our growers, applicators and retailers,” says John Kalthoff, cross platform portfolio marketing leader, Dow AgroSciences. “Located across the country, our field specialist team is dedicated to working with customers to help them confidently adopt the Enlist system.”

Serving Illinois and Iowa, Asbury brings 14 years of experience in sales and agronomy to his new role. He transitioned from his position as a crop protection sales representative with Dow AgroSciences in western Illinois. Asbury holds a bachelor’s degree in agriculture science from Western Illinois University.

Keller will be a field-based technical resource in Minnesota, North Dakota, South Dakota and Wisconsin. His experience includes serving as a crop protection sales

representative for Dow AgroSciences in western Kentucky and a sales representative with Pennington Seed. Keller holds a bachelor's degree in horticultural soil science from the University of Kentucky.

Malter succeeds John Laffey in the western Corn Belt. Malter brings vast experience in agronomy and corn production into the role. Prior to joining Dow AgroSciences in 2012 as a customer agronomist, he held field research roles with DuPont Pioneer. Malter holds a bachelor's degree in animal science from the University of Missouri.

As experts in weed management, application technology and crop research, the field specialists serve as regional resources for the Enlist™ system. They also are integral to Enlist Ahead, a benefits-based, management resource tool designed to help growers, applicators and retailers get the best results from the Enlist system — today and in the future.
