Hillger selected as Enlist™ field specialist in eastern Corn Belt

INDIANAPOLIS — Feb. 13, 2013 — Dow AgroSciences has named David Hillger as an Enlist™ field specialist. He will provide dedicated technical and agronomic support for the Enlist Weed Control System to growers, distributors and retailers in Illinois and the eastern Corn Belt. Regulatory approvals for the Enlist system are pending.

Hillger's knowledge of weed science and application technology complements his synthetic auxin field research. In addition to his work at Dow AgroSciences, Hillger has served as an agricultural education teacher, university Extension educator and custom applicator. He has a bachelor's degree from The Ohio State University and holds both a master's degree and a doctorate in botany and plant pathology from Purdue University.

"David has conducted extensive research on resistant weeds and on application technology," says Damon Palmer, Dow AgroSciences U.S. commercial leader, Enlist Weed Control System. "His educational and in-field experience coupled with his application technology expertise makes David a tremendous in-field resource for customers as they adopt the Enlist system once regulatory approvals are secured."

Enlist field specialists are experts in weed management, application technology and crop research. They also are an integral part of Enlist™ Ahead, a benefits-based management resource designed for the grower, applicator and retailer. Field specialists will help retailers and

seed sellers understand the technology and make sound agronomic decisions for their customers' farms through classroom and in-field training.

"Local growers and retailers value innovation like the Enlist system," Hillger says. "I'm grateful for this opportunity to help the region control glyphosate-resistant and tough weeds so we can all advance modern farming by enabling exceptional performance."

Visit Enlist.com or follow us on Twitter[®] at [@EnlistOnline](https://twitter.com/EnlistOnline) to learn more about the Enlist system.
